

Check your inbox and classroom forums from your mobile

This semester the UOC is to start up a mobile alert service for classrooms. This new feature comes alongside all those that the UOC has introduced to help students use the Virtual Campus and ensure accessibility at anytime and from anywhere.

The mobile alerts for classrooms let UOC students access their personal inbox, or the messages in the forums, on notice boards or in debates in classrooms right from their mobile telephones.

This new tool responds to one of the UOC's aims: to provide wide-ranging and customised access, overcoming the restrictions of time and space.
