

Over ninety percent of students sitting final assessment tests pass

Yet again, the UOC student success rate is excellent. Last year, 94% of students sitting final assessment tests passed the subjects they were studying.

The rate is slightly higher for university master's degrees (an average of 94.8%) than for pre- and post-EHEA degrees, diplomas and engineering degrees (an average of 93.4%). These figures are similar to those of previous years.

Excellent student performance rate

Likewise last year, three quarters of students passed all the subjects they were enrolled on. This rate – known as the performance rate – was around 73.7% of the total.

Exactly 83.6% of university master's degree students, 72.2% of EHEA degree students and 74% of pre-EHEA degree, diploma and engineering degree students passed all the subjects they were enrolled on.
