

Virtual Library: new training section

The UOC Virtual Library has inaugurated a new training section. It brings together all the training materials needed to find out about the information sources and resources available and how to use them.

The aim of the new section is to train students in basic information skills to allow them to access information independently, manage and use it using more visual and intuitive materials that aid self-learning.

The section is structured in two training pathways from which a series of video training capsules can be accessed as well as information skills teaching modules, which are materials created by the Library training team.

Specific training material for information competences can also be accessed. These resources are designed to provide students with the capacity to obtain the most relevant information to satisfy a specific information need.
