

Key initiatives I commit to implement (or at least, work for) if elected for the Doctoral School Commission:

- Make sure PhD candidates needs are listened and taken into account
- Improve communication among PhD students
- Ensure more potential opportunities to share knowledge and projects among PhD students are created
- Work towards more opportunities of PhD candidates to establish links with other universities, scholarships or open doors to other research centers
- Make sure the UOC continues working to improve awareness and recognitions of the University
- Listen, share and make sure the University is aware of all the PhD students worries and needs

In brief, make the Doctoral School a place to learn, conduct research, connect among researchers, and get a degree with certain international recognition

Arturo Callau – PhD candidate
